

> Module presentation

It allows to create texts per language with rich format (HTML) to be displayed in almost any place of your shop (home page, columns, product pages, user account page, ...) according to a time rule to choose between :

- every time
- from ...
- up to ...
- from ... up to ...

> Quick start

>> You are in a hurry ? So, here are some elements to help you create your first messages in a minute.

- Once the module installed, you could get it by the « Preferences » admin tab.
- The first screen you see list all messages you have created. Here is an example :

Messages temporels

Aide utilisateur

Si vous voulez changer la position de l'affichage de ce message dans un point d'accroche, suivez le lien ci-dessous, trouvez le groupe du point d'accroche et utilisez les flèches pour modifier l'ordre.

[Cliquez ici pour gérer les positions du module](#)

Pour trouver plus facilement le module dans les listes, sa description est grisée.

Des documentations sont disponibles dans le dossier d'installation du module. Cliquez sur les liens ci-dessous pour apprendre à utiliser les fonctions du module.

- Documentation module Basic - EN
- Documentation module Basic - FR

- A link above the list allow you to « create a new » message and by clicking a message in the list, you could edit it. In both case, you will reach the editing screen :

In this screen, you could set :

- a name (to find it in the messages list)
- the message content itself (one per language is possible)
- the place to display (choice in a combo)
- the template to use. If you don't understand what it is, don't worry , choose :

- the Standard content template for anything within a page
- the Standard column block template for a column display
- the date rules (everything is explained on the screen itself)

Ok, it's enough to display some custom rich texts in your shop !

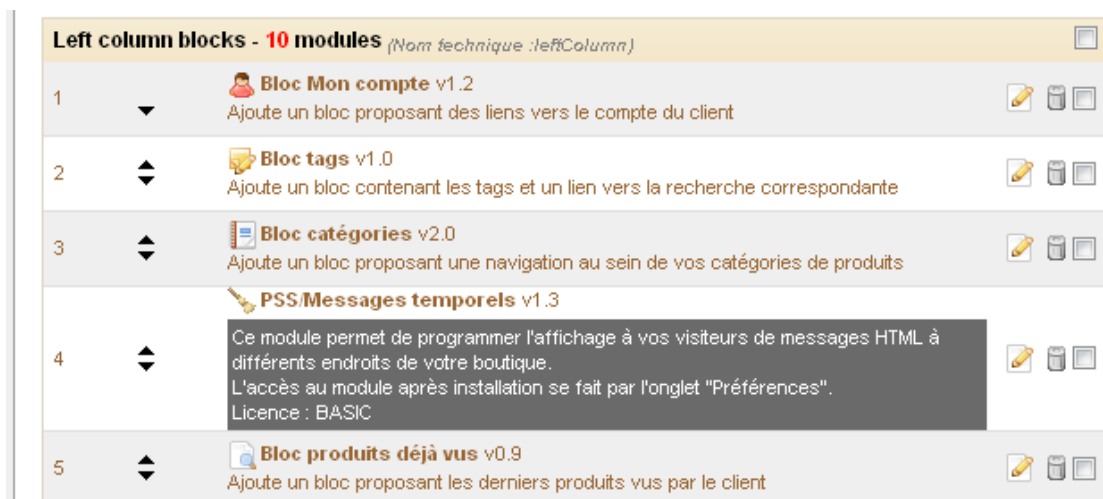

If you want to learn more, then read the doc : « [How to copy elements from your theme?](#) » ...

> Manage display order

Each message is associated to a Prestashop hook but it not the only one. For example, in your left column, you could have other blocks. To change the display order of your message in its hook, then follow one of these methods to reach the « positions » screen :

- by the admin, « modules » tab and « positions » link
- or in your module, you will find a direct link in the help area under the messages list

In the new screen, find the group titled by your message's hook, then find your module in the list (easy to find because its description is grayed) then, using up / dow arrows, change the display order.

Be careful, if more than one message are defined on the same hook, left column for example, it's not possible to manage their relative order.
